Raven Development Operations, LLC

v3 | 2026-11-16

Company capability statement

Raven builds applications, APIs, and research prototypes. We define what to test, record how the system behaves, and deliver versioned code your team can run.

CORE CAPABILITIES

01 **Applications and APIs:** Browser applications, review workflows, and REST APIs for working with operational data.

02 **Simulation and evaluation:** Controlled scenarios and replay to compare system behavior against a baseline.

03 **Sensing and data analysis:** Signal-processing and analysis tools that trace results to their inputs and processing steps.

04 **Integration and verification:** Software integration and automated checks across expected, degraded, and failure conditions.

DELIVERY APPROACH

Agree on interfaces, inputs, and acceptance criteria. Build a working increment for review, record the test results, and hand off versioned code, operating instructions, and open issues.

DOCUMENTED INTERNAL DELIVERY

Raven built and deployed its own portfolio with agency filters, project records, and browser exercises. Release checks covered navigation, direct exercise links, and mobile layouts. Public research exercises use synthetic or modeled inputs.
